2026 - Present **1UG3CA309489-01 (PI Davis)**
Role: Co-Investigator / Biostatistician The BUNDLE study will adapt proven single-cancer outreach strategies into a multicomponent intervention targeting all USPSTF-recommended screenings (colorectal, breast, cervical, and lung), engaging 18+ primary care clinics and 1,600+ patients across Oregon and North Carolina. Using a six-year cluster randomized trial design, the study aims to achieve a 10% or greater increase in screening completion while evaluating cost-effectiveness and the multilevel factors that influence screening behavior.

2026 - Present **3OT2OD038368-01S1 (PI Davis)**
Role: Biostatistician The PRaCTICe Network Research Hub partners with rural clinics across six Western states to support primary care research, education, and technical assistance. Through four cores, Community Engagement, Recruitment & Trials, Data Coordination, and Communications & Dissemination, it facilitates participant recruitment, codesigns studies, and strengthens rural research infrastructure. The network aims to enhance primary care engagement, implement research advances, and improve health outcomes in rural communities.

2025 - Present **5R01AG082931-02 (PI Dorr)**
Role: Biostatistician The MC COMPARE project uses aggregated EHR data via the eCarePlan application to improve care for patients with multiple chronic conditions. It aims to quantify risks, support personalized decisions, and enhance clinical trial outcomes by harmonizing data from multiple sources and engaging patients and providers.
